

October, 2011

Dear Patients and Colleagues,

I have accepted a position as Division Director of Sports Medicine at Cincinnati Children's Hospital Medical Center. My last day of seeing patients at Towson Orthopaedic Associates is October 20, 2011. I have enjoyed the last eleven years and am thankful for the opportunity I have had to work with your children, your families, your patients, your schools, and your teams. It has been a privilege.

Towson Orthopaedic Associates will continue to meet your patients' urgent and non urgent orthopaedic needs. Please call 410-337-7900 and ask for Melissa Towns; she will appropriately place your patient needs with one of our orthopedic specialists in a timely manner.

In addition, please rest assured that we will continue to provide care for the needs of your patients in the following areas:

-Concussion Clinic: Dr. Christopher Vaughan, a pediatric neuropsychologist from National Children's Center in Washington D.C. will continue to staff our concussion clinic. Please call Melissa at 410-337-7900, who will facilitate all concussion calls.

-Fracture Friday Clinic: Our Fracture Friday Clinic continues to offer fracture care before the weekend. Call 410-337-7900, mention the Fracture Friday clinic, and your call will be appropriately cared for. Be sure all calls are placed before 2:30.

I wish everyone good health and the best of success in the future.

Teri M. McCambridge, M.D.
